

## Up to the Surface

Cloud Nothings

I came up to the surface  
Released the air  
With no words to remember  
What happened there

I saw life in the shadows  
On foreign lines  
I knew peace in the terror

There was a night of woe away  
A row of islands go ablaze  
The sun circled 'round the end  
In darkness I've evolved again

Alone in the city, we're here on land  
Cold eyes all around me where I stand  
A frozen planet, I've could nothing made  
Left me alone

Came up to the surface  
Released the air  
With no words to remember  
What happened there

I saw life in the shadows  
On foreign lines  
I knew peace in the terror  
Of the mind
