

You've Got All Of Me

Clout

You set a light to the fire in me
With that animal look in your eyes
I can feel something exciting in me
Every part of my body is coming alive

You found the hidden desire in me
As you stepped right into my mind
You qualify for a licence to love
And I wanna be with you for the rest of my life

You've got all of me
You've got all of me, baby
You've got all of me
Now I want all of you
You've got all of me
You've got all of me, baby
Now I want all of you

Hearing your voice is like music to me
And you know all the words to my song
Both of our hearts and our bodies agree
We're so perfect together we just can't go wrong

You've got the right combination for me
And a talent for turning me on
You're stretching your love to the limit for me
And the message I'm getting is feeling so strong

You've got all of me,...
