

Ride With Me

Cody Johnson

You can here my engine hummin', comin' rumblin' up the road.

And I know when you meet me at the fence line in the sunshine you'll be lookin' fine in your bandanna and your blue jeans.
Baby, would you ride with me.

So climb up in the seat put your bare feet up tap along with the radio.

Girl we can go kick around downtown with the top down we can follow this county road wherever it leads.
Baby, would you ride with me.

Take my hand, say I do.

I want to go down this road with you.
High and low, thick and thin.
Forever just around the bend.
And we'll be right where we want to be, baby, would you ride with me.

You know life is a bull when the gate its pulled and you better be holding on tight.

Its a roller coaster, flippin' over.
It's a sailboat on the tide, on the wide open seas.
Baby, would you ride with me.

Take my hand, say I do.

I want to go down this road with you.
High and low, thick and thin.
Forever just around the bend.
And we'll be right where we want to be, baby, would you ride with me.

Well I've thinking all day that life is a highway we all travel on.

The one that I want to see sittin' in the seat with me when I make my dreams come true, its you, its you.

And it feels so fine when you..

Take my hand, say I do.

I want to go down this road with you.
High and low, thick and thin.
Forever just around the bend.
And we'll be right where we want to be, so baby, would you ride with me.

Come on and take a ride with me.
