What If

Maybe if sometime the possibility could become in theory but wh at if something What if In the future People Just dicided No more Leaders Fighting To control us? Maybe if sometime the possibility could become in theory but wh at if something Freedom What if? I know you want it Well we've come to start it With you What if In the future People Just united? What if life was just an illusion made up by you? Some things don't seem right Change is in sight Some things are so wrong Blind eyes too long I know you want it Well we've come to start it With you
