

# Here to Mars

Coheed and Cambria

Hey stranger  
Been a long while  
Since I loved you  
Or anything  
How the times have changed

Distorted  
A figure set in trend  
Emotionless  
And the words lose all their means  
(Goodbye lost and long forgotten)

Discouraged  
Might be the term  
You choose when you look  
Looking for an excuse

My company has gone mute  
Since listening isn't my strongest suit

I'm leaving you with this here, okay?  
Over and out there, honey

It's in the stars,  
You're my everything  
From here to Mars  
And every word I say I truly mean  
Dear darling, I hope I'm being clear  
Cause there's no one like you  
On Earth  
That can be my universe

Understood  
Give me a second chance  
I know I could  
Be your better half

It's in the stars,  
You're my everything  
From here to Mars  
And every word I say I truly mean  
Dear darling, I hope I'm being clear  
Cause there's no one like you  
On Earth  
That can be my universe

Pardon me, I think I'm going  
Out of my head and into the worst  
A world without your verse  
A world without you hurts  
Please, I'm sorry

I will never let you go (3x)

It's in the stars,  
You're my everything  
From here to Mars

And every word I say I truly mean  
Dear darling, I hope I'm being clear  
Cause there's no one like you  
On Earth  
That can be my burning star

And you're my everything  
From here to Mars  
And every word I, and every word I mean  
Dear darling, I hope I'm being clear  
Cause there's no one like you  
On Earth  
That can be my universe
