Midnight Bottle

Colbie Caillat

Midnight bottle take me calmly through my memories And everything will come back to me Midnight bottle make it real what feels like make believe So I can see a little more clearly Like every single move you make, Kissing me so carefully, On the corners of my dreaming eyes

I've got a midnight bottle gonna drink it down A one way ticket takes me to the times we had before When everything felt so right If only for tonight A midnight bottle gonna ease my pain From all these feelings driving me insane I think of you and everything's all right If only for tonight

Got a midnight bottle Drifting off into the candlelight Where I can find you any old time Midnight bottle I forgot how good it felt to be in a dream just like you had me 'Cause lately I've been stumbling feels like I'm recovering But I think it's only for tonight

I've got a midnight bottle gonna drink it down A one way ticket takes me to the times we had before When everything felt so right If only for tonight I've got a midnight bottle gonna ease my pain From all these feelings driving me insane I think of you and everything's all right If only for tonight If only for tonight, Oh if only for tonight, If only for tonight

I've got a midnight bottle gonna drink it down A one way ticket takes me to the times we had before When everything felt so right If only for tonight, A midnight bottle gonna ease my pain From all these feelings driving me insane I think of you and everything's all right If only for tonight Yeah Midnight bottle, Take the time away From where we are
