

# Broken Open

Cold War Kids

I locked my keys in the car  
I'm pleading for some change  
The meter treats me like a stranger now  
Flashing zeros

I'm juggling a drink too full  
While tugging on a leash that you pull  
And jogging my memory for  
The way to your door

I have been broken open  
By my most trusted friend  
I was the wild card, you were the safe bet  
I've been broken open

I'm up and down that way  
It's easier to say that I'm doing okay  
Than bother to explain  
The water rising

Threw out your crystal ball and your weather vain  
Picasso don't pre-meditate he just paint  
Tonight it's so easy  
To overflow

I have broken open  
Was a perfect gentleman  
Now I'm smashing champagne, tying cans  
Feel like celebrating

I have been broken open  
Dug to china with bare hands  
When you asked me if I'd like to dance  
I've been broken open

Flow over me, flow over, flow  
Over flow

It feels so strange to feel good  
And when I was the fire you were wood  
So when I was petrified  
You understood

I have been broken open  
This was not my master plan  
I was comfortable watching from the stands  
I have been broken open

All my edges are exposed  
I was once content alone  
Now you brought the one that I call home  
I've been broken open

Flow over me, flow over, flow (7x)
