

## Water & Power

Cold War Kids

Minus the car, look past the dress  
Beyond the pearls, who will protect  
Drunk on the stars, shadows evolve  
No resume, no diamond lane

Are you willing? Are you brave?  
Who could make you feel afraid?

Mean what you say, make your mistakes  
Head of silver and gold, your feet crumbling clay  
Forever be yours, counting the hours  
The salt in the mines and the water is ours  
The water is ours, the water is ours, the reservoir

Are you willing, are you brave?  
Who could make you feel afraid?  
Will you give more than you... give more than you take?  
Will you show us what you're... show us what you're made?

Cry and move on  
Cry and move on  
Cry and move on  
Cry and move on

What you're hiding from? You could be fighting, come on.  
What you're hiding from? You could be fighting, come on.  
What you're hiding from? You could be fighting, come on.  
What you're hiding from? You could be fighting, come on.  
What you're hiding from? You could be fighting, come on.
