

Ghost in Here

Cold

Just get up and go
No one believed everything was for you
I came to see anything that way
I came inside was real till I found you
I pulled the sheets and you slipped away
A ghost in here that I can't believe
There's a ghost in here
I can't breathe your killing me your killing me your killing me
your killing me
No one believed anything was for you
I came to see anything that way
Nothing inside was real till I found you
I pulled the sheets and you slipped away
A ghost in here that I can't believe there's a ghost in here
Well I can't sleep it's taken me all this time
Fuck you just get up and go
Torch my world twisted fame
I don't love you sold my faith pleasant dream
I don't deny theres a ghost in here
There's a ghost in here
