

## God's Song

Cold

A victim to another level  
That no one ever cared about  
The way I ease my sufferin  
Is killin me again  
I would not prescribe this feeling for you  
A pain with slow sustain  
Like a sad song lives on

When the world wont take you back  
You know everyone's the same  
We're all a part in gods song

Can't live with this pain forever  
There's nothin left to talk about  
The rain outside is troublin  
It takes me back again  
If I can't describe my feeling for you  
The game will never change  
Like a sad song lives on
