

## It's All Good

Cold

Take another motherfucking hit of LSD  
Let all the love inside the world belong to you  
Well, I can't understand just why you went away  
Too young to feel the pain & bitterness of love  
Well, I can never understand a motherfucking  
Word you'd ever say  
And all the people that you hurt  
Came down on you  
And I can't understand just why you went away  
I sat and waited for the day you'd come back  
home

Well it was all good

Take a loaded gun and blow my fantasy away  
Turn off the light and shine the spotlight  
Down on you  
Well, I could never understand a motherfucking word  
You'd ever say  
And all the people you hurt came down on you  
Well I can't understand just why you went away  
I sat and waited for the day you'd come back home

You are my hope, my god, my love, my fear, my gun  
It's over, it's all good  
Till the world came crumbling down  
Oh well it's all over  
It's all good, until the world came crumbling down  
Oh well it's all over  
It's all good, until the world came crumbling down  
World came crumbling, crumbling, crumbling, crumbling

Well it was all good
