

March On

coldrain

Like the stars in the sky we shared light
Built a fire every night just to survive
We were lost for so long but I never gave up hope
Because I knew you'd be the one to catch me when I fall

If we march on with our heads up
March on through the fire
They say this life can be like hell
But together we'll be fine
So march on

There was doubt in the eyes of the bias
How they love just to hate our existence
But what do you know
We found strength in their denial
Until this day we've carried on
So let them say what they want
Because nothing feels better
Than proving that their wrong

If we march on with our heads up
March on through the fire
They say this life can be like hell
But together we'll be fine
If we march on with our heads up
March on through the fire
I know at times it hurts like hell
But this pain is proof we still can go on

Day in and day out
We've fought for this one shot
So nothing can stop us
No one can hold us down

We are the young and the restless
We won't stop till we're bleeding out
We are the silence the future
We won't stop till we're six feet in the ground

We can march on with our heads up
March on through the fire
They say this life can be like hell
But together we'll be fine

If we march on with our heads up
March on through the fire
They say this life can be like hell
But together we'll be fine
If we march on with our heads up
March on through the fire
I know at times it hurts like hell
But this pain is proof we still can go on

This life is full of obstacles
But through this pain we're not alone
Together we can fight so march on
