

Next To You

coldrain

We're hanging by a thread with nothing left to say
If there is an answer, I guess we'll never know
So tell me "I can't see"
Can't we find our way?
Cuz I can't feel the distance to every nights upon
Now we're losing everything we have

Why?
When you're close to me
Do you feel so far away?
Why?
When you're here with me
Can you still not see my pain?
I'm lying here alone
So cold next to you

You were all I needed to make me feel complete
But in these nights without you
I haven't slept for weeks
I'm listing who I am
And everyday I wonder why
I just gotta let go

Why?
When you're close to me
Do you feel so far away?
Why?
When you're here with me
Can you still not see my pain?
I'm lying here alone
So cold next to you

I played your game
It's time to play We Drifted Far Away
The memories weren't strong enough
We'll never see us live another day
Why?
When you're close to me
Do you feel so far away?

Why?
When you're here with me
Can you still not see my pain?
I'm lying here alone
So cold next to you
