

# How Long Will It Last

Colin Hay

I knew this piece of string  
Ties us together  
But will it ever break in two

I don't believe what they say is true  
That nothing lives forever  
But I keep asking you

How long will it last  
Now the dye is cast  
Does this love have to fade away  
How long will it last

When you walk into the room  
My whole world gets brighter  
And with a smile you wash my fears away

But that old familiar tune  
Walks in behind her  
And then she sings to you

How long will it last  
Now the spell is cast  
Does this love have to fade away  
How long will it last

I used to think that nothing really matters  
I could turn my head and walk away  
There's no crystal ball  
Long ago it shattered  
Leaving only echos in the hall

Here we are again  
Another day is over  
An so we kiss the sun goodnight

And all we really know  
Is what we believe in  
We may be wrong, we may be right

How long will it last  
Will the feeling pass  
Does this love have to fade away  
How long will it last

Does this love have to fade away  
How long will it last
