Turned on and wide awake

Dust it off as a lonely day

We're gonna go where the bed's

(Band's [unverified])

Got. soul

(C'mon)

Just sing away all my pain Sweet honey 'thin my veins We're gonna twist and shout And forget our names

Swing low and turn the lights down
I don't wanna know a better way to heaven
I can feel you shine around me
And I don't wanna know a better way to heaven

I'm gonna make a name, I'll make you my famous claim And I'll take you downtown every night Think you can lock me up, show me what it's all about There's no star I could follow like I follow you

Swing low and turn the lights down
I don't wanna know a better way to heaven
I can feel you shine around me
And I don't wanna know a better way to heaven

I wanna know what it's all about I just know when it all works out Yeah, yeah, yeah, yeah

I heard the gospel truth and I got it all from you You got your message through on time You must be a savior's daughter, feel like I can walk on water When I feel your sweet lips touchin' mine

So swing low and turn the lights down I don't wanna know a better way to heaven I can feel you shine around me I don't wanna know a better way to heaven

Swing low and turn the lights down
I don't wanna know a better way to heaven
I can feel you shine around me
I don't wanna know a better way to heaven
