

Contagious

Collective Soul

Together here we stand
Covered in our rust
It's just a life of pretend
And that's the source of us

Oh girl here we are now
Oh girl In between the days
Oh girl here we go now
Oh girl running through the haze

It's been days since you've seen light
It's been years since it felt right
Our contagious news ..
And the words that you do shout
And the pride that you spill out
You're contagious too

Together here we stand
Turning into dust
Nothing to forgive
And no one here to trust

Oh girl here we are now
Oh girl In between the days
Oh girl here we go now
Oh girl running through the haze
