

# You Speak My Language

Collective Soul

All around the world  
Everywhere I go  
No one understands me  
No one knows  
What I'm trying to say

No one understands me  
They look at me when I talk to them  
And they scratch their heads  
They go what's he trying to say

But you, you speak my language  
Yeah you, you speak my language

All around the world  
Everywhere I go  
No one understands me  
No one knows  
What I'm trying to say

Even in my hometown  
My friends make me write it down  
They look at me when I talk to them  
And they shrug their shoulders  
They say what's he talking about
