

Mutation

Collide

Tell me I just couldn't be
Ever felt like someone else
Feeling some kind of sanctuary
Losing the password to someone
All you need, all you like
All that you can feel

Mutation. Find your own. Mutate
Mutation. Find your own. Mutate

I can't wait forever
I can't wait forever
Something you might need
I can't wait forever
I can't wait forever
Bending and inbetween

Don't unleash
Tremble, release
All that you can feel
I can't wait forever
I can't wait forever
Bending and inbetween

Mutation. find your own. mutate
Mutation. find your own. mutate

Some you can lean on
Some you might
Don't believe I'm safe for now
Can't find the password
Let your mind in
Who would have thought
Take all you feel

Some you like
And some you need
Some you want
And some you bleed
Some you are
And some you alter
Then its off by ten degrees

Tell me you just can't
Lose the password
Something you need
