

Trust You

Colony 5

Trust you, why did I trust you left me here to die
Like in a desert without the most significant life supply

We were meant to be for eternity at least I thought it was
The way we walked through pleasure and pain, but most the pain
This world are giving us why can't we move on

To the other side the side you convinced me exists
The way to eternity together we shall leave

Trust you, why did I trust you left me here to die
Like in a desert without the most significant life supply

All those lies you fed me with I believed you what a fool
I have been the paradise on the other side
All the planning we made about the suicide

Trust you, why did I trust you left me here to die
Like in a desert without the most significant life supply
