

Drift on your love

Colorfactory

Last night I had the same old dream
you were lying in my arms, you were
the love we made it tasted sweet
all we could ever want

that moment in your arms
was like i lifetime in heaven
I gave you all I had
all of me forever
when I held you close
I knew I would never

Let you go
drift on your love
when you're lying next to me
I can't drift on your love
when you're lying next to me

If I could live my life again
it would be our love affair
you pulled me in and held me close
to a love just beyond compare

that moment in your arms
was like i lifetime in heaven
I gave you all I had
all of me forever
when I held you close
I knew I would never

Let you go
drift on your love
when you're lying next to me
I can't drift on your love
when you're lying next to me
I can't drift on your love
when you're lying next to me

It's time to start releasing now
all the feelings we can't hide
so hold this moment for all time
glowing deep and warm inside

that moment in your arms
was like i lifetime in heaven
I gave you all I had
all of me forever
when I held you close
I knew I would never

Let you go
drift on your love
when you're lying next to me
I can't drift on your love
when you're lying next to me
I can't drift on your love
when you're lying next to me
