

Getting The Fear

Combat 84

You turn around and realise that you're surrounded
Standing there your worst fears are compounded
Lock your doors but you can't stop us coming in
Deny we're out here but we're your worst nightmare come to life

Get the fear, know we're here
When your world starts to fall apart

Close your eyes our existence cannot be suppressed
Turn your head put your faith in nature to the test
Think it out, society is shutting out the best
Shut it down, survival for the strongest not the rest

Get the fear, know we're here
When your world starts to fall apart

Things will change defend your homes and family first
Go to ground and let the countries forces take the worst
Side by side change the rules, stop this money thirst
Arm yourselves, people rise up 'cos judgement day is here, the bubble
's burst

Get the fear, know we're here
When your world starts to fall apart
