## **All Pain is Gone**

Combichrist

Stuck in a hole, enslaved by emptiness Fist clenched tight, though I'm not alone They're always here, controlling my thoughts Every sense, every sound, every image, abstract They're all around, watching me die Free will, obsolete, intention unknown This is the day, the day I'll try 'Cause this is the day, the day I die

This is the day, the day I die All pain undone, all pain is gone

Come set me free, all pain is gone Come set me free, all pain is gone All pain undone, all pain is gone Come set me free, all pain is gone

And it's never enough, the story never ends A chapter is closed, another one's revealed Razorblade love, I can taste the peace Another day gone, another chapter complete They're all alone, watching me die Free will obsolete, intention unknown This is the day, the day I'll try 'Cause this is the day , the day I die

Come set me free, all pain is gone Come set me free, all pain is gone All pain undone, all pain is gone Come set me free, all pain is gone

Come set me free, all pain is gone Come set me free, all pain is gone All pain undone, all pain is gone Come set me free, all pain is gone
