

# Through These Eyes of Pain

Combichrist

The soil drenched in blood  
She's got a grin on her face, she listens to the voices in my head  
I've always been her favorite toy, a machine without a soul  
Her hands are bruised, the body dead  
Memories flood through my mind, I'm shattered, I am falling apart  
I am her final sin  
Now I need to pay attention, she says pain is all we have  
And through fear we'll conquer our betrayal

The time is slowing down  
The time is slowing down  
What brings us to an end  
Through these eyes of pain

She'll twist the knife, then asks for a light  
Lights a cigarette, she sais the world is dying tonight  
Anything can happen now, you're sad, I know  
You know, they said it's gonna be alright  
But I'm sorry to disappoint you but the angels they're all dead  
I will leave your heart on my grave

The time is slowing down  
The time is slowing down  
What brings us to an end  
Through these eyes of pain

The time is slowing down  
The time is slowing down  
What brings us to an end  
Through these eyes of pain

The time is slowing down  
The time is slowing down  
What brings us to an end  
Through these eyes of pain
