

# Now That I Have You

Company

All of my life it seemed  
That something had been missing  
I didn't know what to do  
Days would pass me by  
Each as lonely as the other  
Until I met you

You opened the door  
And let the sunshine in  
My life will never be the same again

Now that I have you  
Everything just seems so right  
Now that I have you I'm alive  
You are the song that I'll be  
Singing my whole life through  
I'm living in a brighter world  
Now that I have you  
Looking ahead I see  
The two of us together  
I'll never let you go  
You're so dear to me  
And it isn't any wonder  
Why I love you so

You opened the door  
And let the sunshine in  
My life will never be the same again

Now that I have you  
Everything just seems so right  
Now that I have you I'm alive  
You are the song that I'll be  
Singing my whole life through  
I'm living in a brighter world  
Now that I have you

I feel this love is real  
I see it in your eyes  
You take my hand and I understand  
You are mine  
You are mine

Now that I have you  
Everything just seems so right  
Now that I have you I'm alive  
You are the song that I'll be  
Singing my whole life through  
I'm living in a brighter world  
Now that I have you
