

Strength To Strength

Condemned 84

Make your feelings known
Don't let them tell you what to do
Make a name for yourself
Fight back like you know you will
Ignore their threats and lies
They're nothing but the enemy we despise
Always slagging us down
With our hair cropped short and braces down

Stand up, stand proud, stand strong
Show them that you're proud to belong
Stand up, stand proud, stand strong
Don't let the bastards grind you down

Our unity is strength
Sticking together is what it meant
Head held high and proud
Always trying to knock us down
Love for our country and land
Something they'll never fucking understand
Getting their power from greed
Scared of us cause we're the new breed
