Safe as sound
What am I talking about? Of course it's not safe
Look at what corporate gain is doing to our children
And our sanity? Insanity!

Sanitary, insanitary
Am I left fit to believe?
Am I left fit?
Fit for what? What for! For who?
Who gains?
Weight gains? Weight watchers?
Watching what? Watching who?

Wanting existence, wanting a distance, wanting to exist

Before the thinking ... the sun kills alone ... after the thought

If this is how you see it, you have to make it known
If this is how you free it, you have to make it known
This is how you see it; you have to make it known
This is not too serious to have to make it known
