

Just Let Me Know

Connie Smith

If you're trying to win my heart there's no denying
I admit, you don't have very far to go
So when you wanna talk to me about forever
I'll be yours from now on, just let me know

When love like this comes along, it's such a treasure
And it amazes me how deep real love can go
Oh, you're the one I have dreamed about forever
And the way you've touched my heart just lets me know

When you're here in my arms who needs tomorrow?
Together day by day we'll watch love grow
And anytime you need some love and understanding
I'm always here for you, just let me know

With you here in my arms who needs tomorrow?
Together day by day we'll watch love grow
And anytime you need some love and understanding
I'm always here for you, just let me know
Yes, I'm always here for you, just let me know
