

## Angry Angel

### Conquest

Night is falling on the Earth  
Will ever show life light of day?  
It's the end but where is source?  
Why did the sunbeam go away?  
Do you remember time when sky was blue?  
It seems these days will never true...

Chorus:

Angry Angel spread his wings across the sky  
And world's immersed in endless night  
Moon is coldly shining, sun will never rise  
Forgotten world is gonna die under ice

Take your sword and take your shield  
When we're together - we are strong  
Enemies had burnt your fields  
We're waiting for revenge so long  
Do you remember time where sky was blue?  
It seems these days will never true...

[Chorus.]
