

## Slave Driver

Converge

No longer feel you  
No longer fear you  
I've worked overtime  
In your cancer factories  
Lived with those lies

To make those loose ends meet  
I've taken all my chances  
And still I'm missing steps  
Another losing battle

For those left for dead  
I've fed their rabid feast  
Yet still pick from my own bones

I've ripped out my own heart  
Trying to keep you whole  
I've lived like true angels  
I've only learned to fall  
I've sold myself to death

For nothing at all  
No longer feel anyone  
No longer fear anything  
I've hung my sorrow  
On your promised apologies  
I've left the nest  
With broken/battered wings

The blood in my eyes  
Has taught me to defeat  
The beasts at the feet  
Of saint obscurity  
No longer feel  
No longer fear
