

Except For You

Conway Twitty

Except for you, I've never known what love is
Or how it feels to have a dream come true
But now I find my world no longer lonely
The way that it would be except for you.

One by one you mended all the pieces
Of a heart that someone broke in two
You filled my life with happiness and sunshine
That I never would have known except for you.

You brought all the rainbow colors to a world of solid blue
There's nothin' prettier than rainbows, except for you
And so my love I wanted just to tell you
This old heart won't beat again, except for you.

My old heart won't beat again, except for you...
