

It Is That Way

Corrosion of Conformity

Distant wings bring you down like a soldier
Alive inside but your soul getting colder
And there's nothing left nowhere to hide
Nothing left, it's genocide
You're gonna find out

It is that way because it is
It is that way because it is
It is that way because it is

Over now and I'm going down
Big old wall gonna fall like religion
As you die inside while you pray for redemption
And there's nothing left nowhere to hide
Nothing left its genocide
You're gonna find out

It is that way because it is
It is that way because it is
It is that way because it is

Over now and I'm going down
Nothing left nowhere to hide
Nothing left its genocide
Your gonna find out

It is that way because it is
It is that way because it is
It is that way because it is

Over now and I'm going down
So what do you want me to be
I'm the same old beast you hate to see
Just like the heavens when the light recedes
I'm forever black without a need

And there's nothing left and nothing more
'Cause you lost the battle and the war
So what are you standing here for!
