

Not Enough Time

Cosmic Gate

With their wicked words
They'll try to hold you down
No this is not our fate
The lives in which they are bound
And there is something more
We know it has to be found
I know the world won't wait
The tide is turning around
And there's not enough time
There's not enough time
And there's not enough time
There's not enough time
With all their wicked words
They'll never hold you down
No this is not our fate
The tide is turning around
And there's not enough time
There's not enough time
And there's not enough time
There's not enough time
In the fallout of the wasted in the halflight
I stand before you in the last dance of an old life
Now the cool wind's blowing and we can't stay, but it's
alright
When the night is gone
I will still be here
And there's not enough time
There's not enough time
And there's not enough time
There's not enough time
