

When you run into my open arms
I will keep you safe
There's nothing more that I can do
But keep fighting through

When you run into my open arms
I will keep you warm
Everything that burns inside
Fighting through fighting through

Everyday is one step closer
We have to move along
Everything will pass inside us
Nothing left to leave behind

We're fine
We're fine

Shine so bright
Lead us through
As it fall from the sky

We are the shooting stars
Run with them and know we are together
We'll shine who knows our worlds collide
I hear noise and you are mine together

We'll shine forever
We'll shine forever
