

## Better Part of Me

Course Of Nature

Something says to me don't be afraid  
But if I don't worry I'll surely slip away  
I need to speak to you, hear what you say  
But if I breathe too hard I think I'll go insane

There's a part of me so insecure  
Of all that I could have and all that I've gone through  
If there could be a way through a better design  
I'd probably screw it up and let it slip away

Well I wonder if I stayed here would you become a better part o  
f me  
I can say now that you changed me and I've become a better part  
of me

I am the strongest I have ever been  
The very thought of you can't even comprehend  
The safest bet for me is to focus hard  
And try to face myself I can't take it anymore

I hope I'm everything  
That I need to be  
You are my everything  
So I'll just stay
