

# It Took A Woman

Craig Morgan

It took a bully riding my back to make me mad enough to fight  
And a summer with my granddad to find out what hard work's like  
It took that football coach in high school to make me tougher than the rest  
That first beer with my daddy to put that first hair on my chest

It took a heart to heart with Jesus  
To bring me to my knees  
But it took a woman to make a man out of me

It took a pair of soft blue eyes  
And a smile so sweet to make me reach up high and really dig down deep  
She made me so much more than who I used to be  
It took a woman to make a man out of me

It took the first year we were dating and hanging too much with the boys  
For her to give an ultimatum for me to have to make a choice  
It took that want add in the paper to sell that '68 Firebird  
Buy that diamond ring I gave her and rent out that little church

It took the day my baby girl was born  
To make a tear roll down my cheek  
But it took a woman to make a man out of me

It took a pair of soft blue eyes  
And a smile so sweet to make me reach up high and really dig down deep  
She made me so much more than who I used to be  
It took a woman to make a man out of me

She made me so much more than who I used to be  
It took a woman, oh it took a woman to make a man out of me
