

I Still Believe in Love

Crash The System

Love has been a stranger
Creeping up behind me
Will I ever learn?
A million thoughts are
Running through my head
Will I crash and burn?

But like a wise man said
Love can do anything
Do anything
We'll be blessed one day
It all takes time, you'll see

I do believe that love
Can do miracles
It doesn't care who you are
Girl I still believe in love
One day it finds us all
I can't believe you though that our
Love was just a lie
Girl I still believe in love
And we will have it all

No one has the answer
Can see into the future
You gotta wait and see
You should seize the day
That comes your way
Believe in me

And we will have it all, yeah
And we will have it all

And we will have it all, yeah
And we will have it all
