

## Change The World

Crashdiet

We are the young believers  
Of a world without rules  
The plague against deceivers  
A freak show for the fools  
Some want us six feet under  
They just can't take the truth  
But they just feed the hunger  
Of our wicked youth

Try to strangle me i will not plead  
I could end up dying but my soul is free

We won't change the world  
Till we're dead and burned  
But the world will never change me  
Superficial race  
Tries to change our ways  
But the world will never change me

Some say we are the poison  
I say we are the cure  
When fighting for a reason  
You'll end up wanting more  
Derived from strong conviction  
We're standing by our roots  
Come join the new religion  
Sinners for the truth

You could strap me down  
But i would still be sane  
I will fight you back  
Till we go down in flames

The world where we live  
Is barren place  
We live and breath  
Though we've fallen from grace  
The time will come  
When we'll inherit the earth  
We carry this flag 'till we lie in the dirt!
