## Shining

## Crematory

You are so fixed with yourself That you can't behold your life passing you by Wake up brisk before you vanity breaks you Open your eyes while you still can

When you need me - just before the memory you Hear my voice coming through your mind When you need me - just before the memory Hear my voice coming through your mind

Your friends suffocated by your ego Your siblings haven't known you for a long time Even death refuses to tread on your doorstep Ensued the false passage all your life

When you need me - just before the memory you Hear my voice coming through your mind When you need me - just before the memory Hear my voice coming through your mind

No one here that misses you again No one here to show you how to fly Have no respect for life Have no reverence for death Mercy a world used by losers Pain and sorrow gifts from heaven Never will you love Never will you live

When you need me - just before the memory you Hear my voice coming through your mind When you need me - just before the memory Hear my voice coming through your mind
