The Loss

Crematory

Day for day, year for year I'm waiting to sence you once again Where were you When i longed for you Where were you When my inner being died Where were you where

I see smoke, patches of fog Darkness clothes me well Where were you all the years Where were your signs The search for you is the loss of you

Where were you When i longed for you Where were you When my inner being died Where were you When i longed for you Where were you When my inner being died

I am smoke and patch of fog Darkness does not see me I was your own sign That i was searching for all the years That i was searching for all the years

Where were you When i longed for you Where were you When my inner being died Where were you When i longed for you Where were you When my inner being died

The search for you is the loss of you The search for you is the loss of you The search for you is the loss of you The search for you is the loss of you
