

# Where Are You Now

Crematory

If death were just a dream  
In the end you sing your final scream  
So sleep can't be - anything but reality  
And so you sing and see  
For it sounds so violently

Where are you now  
When the face is falling to the ground  
This is the first, the beginning  
This is my love, which I am singing

You are inside of me  
Any fool could see  
If darkness fakes the light  
It would have come true  
If you had not changed the truth  
So you burn in fire

Where are you now...

Where are you now - When you stole a heart to break  
Where are you now - When you feel someone's watching you  
Where are you now - When you are all alone  
Where are you now - When the sun comes down...Comes down

Afraid of the light  
The dark shines way too bright  
A shiver of cold light  
The sand turns red  
The eyes turn blind  
The lights fade out of time  
Pounding heart, moving blood

Where are you now...

Where are you now - When you stole a heart to break  
Where are you now - When you feel someone's watching you  
Where are you now - When you are all alone  
Where are you now - When the sun comes down...Comes down

The death of silence  
Deriving from you  
Loud sounding sirens  
Getting me down, getting me down, altering the truth

Where are you now - When you stole a heart to break  
Where are you now - When you feel someone's watching you  
Where are you now - When you are all alone  
Where are you now - When the sun comes down...Comes down

Where are you now
