

# Eyes Of Tomorrow

Cro-Mags

God damn alarms are ringing in my head  
Wake up world or we're all gonna wind up dead  
Look around I see the hate and the greed  
Lifestyles of the rich still people dying in need

Wake up world things are gettin' serious  
I'm looking at the future and it don't look too good for us  
If we don't take the situation at hand  
And spread a message of peace all throughout the land

Cause I'm looking through the eyes of tomorrow  
And all I see is misery and sorrow  
Desperation and despair everywhere  
Reactions of a system that just don't care

Greedy politicians leading people astray  
They just want more money they don't care what it takes  
Polluting the earth destroying the environment  
Building bombs for war and killing the innocent

My mind's in a rage they got me living like an animal  
They're feeding off human lives just like cannibals  
Killing the planet and everything on it  
With their chemical waste dumps and nuclear power plants

Our tax dollars are killing people overseas  
Still people dying at home but no one hears their pleas  
It's time we the people take their power away  
We can't let this madness go on another day

Keep the youth dumb and numb to the state they're in  
Keep 'em fighting each other selling crack, coke, and heroin  
Mind controlling the masses with TV and the media  
What they let you hear don't mean you're free you know

Revolution in the mind but the body must follow  
Cause I'm looking at the future through the eyes of tomorrow

Yeah

Take a look at what they've done  
How can we let this madness go on  
Through the eyes of tomorrow its very clear  
No turning back is we don't start right here

Must stand up, know we must stand up

Don't want their dying world of injustice and pollution  
We got a solution time for revolution  
Must pave the way for a brighter day  
They won't give it we gotta take it  
Our lives are at stake

A barren wasteland is the price we'll pay  
if we don't stand up and fight for the world today

Must stand up, know we must stand up

You see them cutting down all the trees  
Poisoning the air, the land, and seas  
Destroying the planet and all that it's worth  
Just for their moments of pleasure on earth  
Their hunger for power would be all our end  
If we don't stand up and fight now my friends

Take a look at what they've done  
How can we let this madness go on  
Through the eyes of tomorrow it's so very clear  
There'll be no turning back if we don't start right here

Here we go time and time again  
The rich man keeping the poor man in line again  
You must be blind cause you keep on following  
Them and their system straight to you grave

Your minds in a cage you're just another slave  
To false values and false ideals  
Peace of mind so hard to find  
They got us living on the edge of such coptic times

We need a planet without war or greed  
Healthy environment clean air to breathe  
Equal opportunity and justice for all  
United we stand or divided we fall
