Sister

Cross Canadian Ragweed

I use to get stoned on my sisters record collection Gold and platinum on vinyl was the closest thing to perfection Rock & roll, acoustic guitar Not even comfortable with who you are I'd blow the roof if I had a fast car

I changed my mind in my best friends El Camino He blew my drums that summer night in El Reno Turning up the STP, turning down the LSD On a bottle of booze and the best of his cousins weed

What if I was the one that you warned me about You were the one that needs to come around We got together and we worked it out No one would shut us down. If it all dried up and blew away With a handful of checks on a rainy day Would you turn around or would you stay Would it matter anyway

What if I decided to take the nation I'd break the knob just so I could feel the frustration Yeah, turn it up til you hit top speed Yeah, its all that I'll ever need When you bear your heart You better be prepared to bleed
