

## To Find My Love

Cross Canadian Ragweed

There's a view from here where you can see tomorrow  
And after that it's up to you  
There ain't no point in tryin' to drown your sorrows  
The point is they're drownin' you

And fools like us, we've got to stay together  
If we're partyin' in the streets  
'Cause we both know how plans can change  
Quicker than a heartbeat

And I have searched the world to find my love  
And I have searched my soul to find my love  
And I just wanna be sure the love we share is strong and pure  
And I have searched the world to find my love with you

Your still broken dream for a dime a dozen  
Get a broken heart for less  
You steal a poem from your second cousin  
But you better get your money blessed

And fools like us, we've got to stay together  
If we're partyin' in the streets  
We both know how plans can change  
Quicker than a heartbeat

And I have searched the world to find my love  
And I have searched my soul to find my love  
I just wanna be sure the love we share is strong and pure  
And I have searched the world to find my love with you

There's a view from here where you can see tomorrow  
And after that it's up to you  
There ain't no point in tryin' to drown your sorrows  
The point is they're drownin' you

And fools like us, we've got to stay together  
If we're partyin' in the streets  
'Cause we both know how plans can change  
Quicker than a heartbeat

And I have searched the world to find my love  
And I have searched my soul to find my love  
And I just wanna be sure the love we share is strong and pure  
I have searched the world to find my love with you
