Wake me up!

This virtual is morphing it's more than a vision

Please sing to me

This dream is pulsing but I can't hold you now

I'm falling down I'm feeling your hollow emotions

I'm becoming your veins you swim in my head

"I sink more into you"

Do you remember? The days are fading without you (without you)

My anxious heart baby can you feel it?

I sink more into you

I won't forget all your crying

Your voice lights up all my memories

You start to fade did I love you?

I'm so far away from you

You're so far away from where I need you to be

Take me with you

I need you here with me

Wake you up, wake you up

I'll wake you up I'm gonna save you now

I'll wake you up I'm gonna save you...
