

# The Evolution

Crossfaith

Change! It's all I need  
Cause I can not figure me out  
It's inundation  
Now! Now it's time  
I gotta change everything stop this delusion

If we are not so strong  
Sometimes things can go wrong  
We're going round and round again with  
Complications  
I'm stuck inside a bad dream  
To wake I need gasoline  
What am I looking for now?  
It's evolution!

Do something big  
Just tear your heart out  
Do something...

Hey! We are the evolution  
Take charge of your own transformation  
Hey! You need a revolution  
Your brain needs a major mutation

Faith! One must believe  
Wake up your brain come through the storm  
You must have conviction  
Time! You can't escape  
The future starts today  
Release your illusions

Let go of ego  
Let go of bullshit  
Stop your whining it's time for action  
Go!

Why do you spiral around?  
Stop drowning inside of your fear

Hey! we are the evolution  
Take charge of your own transformation  
Hey! you need a revolution  
Your brain needs a major mutation

Now! we are the evolution  
Now! you need a revolution  
It's time for action now
