

# The Cemetery Angels

Crowbar

You gave me wings  
And took the sky away  
Clawing and fighting to live another day  
You seduced me and took away my mind  
But now I control you  
I'm leaving scars behind

And through the darkness and knowledge I've gained  
Will carry me  
Building the mountain again and again

They watch over me...

I've heard the lie  
And lived the misery  
Now I'm accepting the man that I can be  
It takes the magic  
That only brings you down  
Sooner or later we all give in and drown

And through all the darkness and knowledge I've gained  
Will carry me  
Building the mountain again and again

Alone in this fight I believe in myself  
It carries me  
Building the mountain again and again

They watch over me...  
They watch over me...

Bring it down!
