

Isolation

Crowded House

You arrive
Like a dragonfly
Float above the grass
Trembling still

Think you might
Open up your heart
Open up your heart
Someday you will

Yes, there's always a way
Yes, there's always a way
To end this isolation

When you rise
Like the Milky Way
On a luminous night
The epic unknown

Though I try
Try to find a sign
Of another life
I am alone

There's always a way
Yes, there's always a way
To end this isolation
One step away from everyone

If you could open it up
You could connect it to us
One step is more than enough
To get a look in

You could be already gone
I wish you would take me along
To end this isolation
To end this isolation

I try so hard to get it right
Look for something in your eyes
And I see it
But you won't let yourself feel it

I wait for you to make a sign
Let the door open in your eyes
And I believe it
That one day you'll step inside
