

In no way any other, we will do  
Fly, Ride, any weather, nothing new, in blue  
Speeding in a stream with a sense no-one else can define  
Floating as a cream in a bliss that you no longer feel time

Right through gravity!  
Just right through what Earth planned!  
Right through gravity!  
Right through now, let them loose, oh!  
Right through gravity!  
For all that's not falls down!  
Right through anomalies, with one worth believing in, oh!

All within the speed of a light that one will fight to command

Just maybe, ready never, still we do  
For none is ever better, win or lose it all  
Beaming just to be on a path that's set to shatter the grounds  
Although it's but a dream, but in dreams are where the "never"s are found

Rise and let go!  
Uprise until unbound!  
Keep rising, evermore!  
Let all go, let them loose, oh!  
Ride and let go!  
In light in which sun drowns!  
Break and make it all!  
Don't stand down against the rules, oh!

Don't stand down, break through!  
Through light in which sun drowns!  
Don't stand down, break through!  
Let all go, break them loose, oh!

Right through gravity!  
Just right through what Earth planned!  
Right through gravity!  
Right through now, let them loose, oh!  
Right through gravity!  
For all that's not falls down!  
Right through anomalies, with one worth believing in, oh!

With one worth believing in!  
With one worth believing in!  
Just ride on until it's though, oh!
