

# Love May Find You

Crystal Gayle

How can I trust this love to this wind  
Did it ever bring you closer to me  
And how can I keep every breath that I breathe  
From blowing away the seed

Love may find you, love may blind you  
I still dream of you in my life  
If you need me, please believe me  
I'll still want you here by my side

I thought I felt you reaching for me  
Just like I used to reach out for you  
And if you said it'll be alright  
There's nothing that I won't do

Love may find you, love may blind you  
I still dream of you in my life  
If you need me, please believe me  
I'll still want you here by my side

Never really thought I'd be in love like this  
But that was long before I ever felt your kiss  
And what I'd miss

Love may find you, love may blind you  
I still dream of you in my life  
If you need me, please believe me  
I'll still want you here by my side

Love may find you, love may blind you  
I still dream of you in my life  
If you need me, please believe me  
I'll still want you here by my side
