

## Me Against The Night

Crystal Gayle

Moon, please don't shine on me  
Help me hide his memory  
Stars, don't light the midnight skies  
Cos you don't wanna see me cry

Heart, don't let me think of him  
Lock your door, don't let his memory in  
I feel the cold wind blowing through  
A love like this was meant for two

But it's me against the night  
And I'm afraid it's a losing fight  
I see you in every shadow of the room  
You're not here to hold me tight  
I can't wait til the morning light  
There's no way to win  
When it's me against the night

Gone, you said you'd never be  
And I let you belong with me  
Burning tears fall down like rain  
Longing for your love again

But it's me against the night  
And I'm afraid it's a losing fight  
I see you in every shadow of the room  
You're not here to hold me tight  
I can't wait til the morning light  
There's no way to win  
When it's me against the night  
Me against the night
